2021-2022 FIVE YEAR DISTRICT FACILITIES WORK PLAN

Please request Board approval of the attached copy of the 2021-2022 Five Year District Facilities Work Plan. If you have any questions, please let me know.

Thank you for your assistance in this matter.

### INTRODUCTION

The 5-Year District Facilities Work Program is a very important document. The Department of Education, Legislature, Governor's Office, Division of Community Planning (growth management), local governments, and others use the work program information for various needs including funding, planning, and as the authoritative source for school facilities related information.

The district's facilities work program must be a complete, balanced capital outlay plan that is financially feasible. The first year of the work program is the districts capital outlay budget. To determine if the work program is balanced and financially feasible, the "Net Available Revenue" minus the "Funded Projects Costs" should sum to zero for "Remaining Funds".

If the "Remaining Funds" balance is zero, then the plan is both balanced and financially feasible. If the "Remaining Funds" balance is negative, then the plan is neither balanced nor feasible.

If the "Remaining Funds" balance is greater than zero, the plan may be feasible, but it is not balanced.

#### Infrastructure Tracking

Necessary offsite infrastructure requirements resulting from expansions or new schools. This section should include infrastructure information related to capacity project schedules and other project schedules (Section 4).

The Baker County School District is in the process of Special Facilities Funding for a new K-5 Elementary School off of State Road 121, south of Macclenny, that began in the 2020-2021 budget year. The District will be required to construct deceleration lanes and turning lanes on SR 121 for entry into the new school. Provisions of 1013.33(12), (13) and (14) and 1013.36 must be addressed for new facilities planned within the 1st three years of the plan (Section 5).

The new K-5 elementary school approved by DOE is located south of Macclenny on State Road 121. The school will be on the west side of SR-121, south of Southern States Nursery Road and north of Bobbie Sapp Road.

RE:

Board Approval for Network Vulnerability Testing

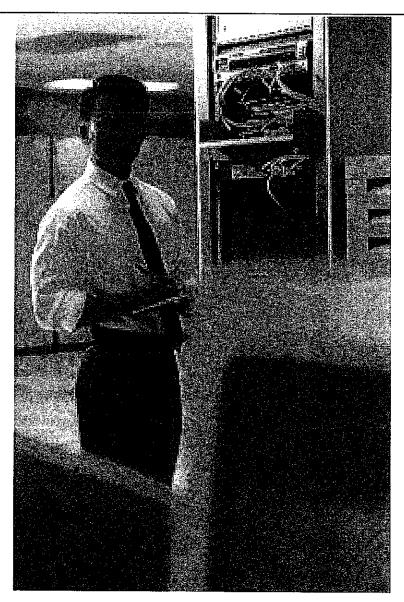

Due to the ever-changing nature of computer networking and cyber security, we have been made aware of some new security standards for cyber insurance by Arthur J. Gallagher & Company. Because of these new standards, it is necessary to have an expert evaluate the Baker County School District's network vulnerability. The initial evaluation provided by Mark Akins of the Baker Business Center is free to the school district, and if any remediation is needed, it will be performed by the district's IT department. If the remediation exceeds the district's knowledge, then Mark Akins with the Baker Business Center will provide his services for a separate negotiated fee.

Please request board approval of the proposal from Mark Akins of the Baker Business Center to perform a network vulnerability test. If you have any questions, please let me know. Thank you for your assistance in this matter.

EXTERNAL / INTERNAL VULNERABILTIY / PENETRATION TEST AND FIREWALL REVIEW Solution Security Consulting

### Background

Baker County Schools (herein referred to as Customer) has requested a proposal from the Baker Business Center to perform an internal and external network and application layer penetration test. The Baker Business Center engineer performing the penetration test is a Certified Information Systems Security Professional / Certified Information Systems Auditor and has extensive experience performing ethical hacking activities.

### **Project Scope**

Our purpose, as detailed within this Statement of Work (SOW) is to provide professional services to Customer to perform External and Internal Penetration Testing to identify and possibly exploit vulnerabilities. Customer has the following objectives:

### **External Network Penetration Test (PEN)**

The Baker Business Center will conduct a grey box network penetration test as well as a vulnerability assessment on up to 16 public IP addresses, which involves performing reconnaissance "foot printing" on the target IP addresses, scanning for vulnerabilities and then attempting to gain access via exploits or brute force attacks. A Final Report and presentation will be provided documenting what vulnerabilities have been found, if we were able to gain access and the remediation recommendations for every vulnerability observed. Additionally, the Customer must ensure and confirm a full backup of their public infrastructure, including any databases, before the start of this test. Public IP Addresses to be provided before testing begins.

### **Internal Network Penetration Test (PEN)**

The Baker Business Center will perform a comprehensive firewall review, as well as a grey box network Penetration test test on up to 115,000 Internal IP addresses, which involves performing reconnaissance "foot printing" on the target IP's, scanning for vulnerabilities and then attempting to gain access via exploits or brute force attacks. A Final Report and a companion presentation documenting what vulnerabilities have been found, if we were able to gain access and remediation recommendations for every vulnerability observed.

The following is determined to be out of Scope for this penetration test:

- Client-Side Attacks
- Mobile application penetration testing
- Denial of Service attacks

Internal web application testing

Wireless Network testing

Physical Tests

Social Engineering

Note: THE BAKER BUSINESS CENTER will provide the customer with three reports,

External Test Report, Internal Test Report, Internal firewall Report.

Note: THE BAKER BUSINESS CENTER will conduct a retest on discovered items that are

remediated within 90 days from the delivery of the report.

The Baker Business Center has created a proven methodology for performing non-risk-

based security assessments. This external and internal penetration test will take place as

outlined below:

Penetration Test Engagement

The Baker Business Center will define and document the proposed external and internal

penetration test plan. This phase will be accompanied by an authorization letter or

approving the Baker Business Center to perform the penetration test plan and signed off by

Customer

The Customer and the Baker Business Center will define the rules of engagement as it

pertains to reconnaissance and testing.

Penetration Test Reconnaissance

This phase of the project incorporated reconnaissance as it pertains to information systems

via information gathering and fingerprinting. As the Scope does not allow social engineering,

most of these steps will be passive.

From the external network or Internet, the Baker Business Center will perform targeted

scanning on various Customer information assets including the Customer's public-facing IP

range within Scope of this engagement. Enumeration will take place on the scan data

collected, as well as information obtained from the public Internet.

*Confidential. Intended for review by representatives of Baker County Schools and the Baker Business Center

From the internal network, the Baker Business Center will perform probes and scans to map the internal network. Enumeration will take place on internal systems.

Enumeration and testing of available services and ports to include:

- ➤ Edge Router Testing
- > Firewall port scanning / ICMP Sweeps including TCP and UDP ports
- > SMTP, POP, IMAP, OWA testing
- VPN gateway and Remote Access
- > External DNS Analysis

### **Penetration Testing**

The testing phase of the project is where vulnerabilities are identified, validated, and exploited. Compromise of Customer infrastructure, including network, systems, applications, and data, will be attempted. Any critical vulnerabilities and exploits will be documented, and the point of contact for the Customer will be alerted forthwith after testing is complete. Depending on the nature of the vulnerability, exploit, and risk severity rating, this may require immediate patching and hardening. The Baker Business Center will notify the Customer of any specific vulnerability identified.

The Baker Business Center will use a unique variety of penetration testing frameworks, as well as custom/proprietary tools and techniques to achieve testing requirements. The Baker Business Center will use attack techniques frequently employed by real-world hackers to create the most realistic testing scenario. All identified external attack vectors will be manually verified to determine their threat level and potential impact. Internal attack vectors will be sampled for exploitation, but a full vulnerability analysis will be inlouded. Our process and testing will include, but is not limited to, the following:

- > Scan external and internal address ranges using multiple tools and utilities
- > Identify and analyze operating systems and services of discovered systems/devices
- Manually assess external applications as applicable
- > Eliminate, as much as possible, false positives

^{*}Confidential, Intended for review by representatives of Baker County Schools and the Baker Business Center

- Research vulnerabilities to services and applications, based on results
- > Confirm identified vulnerabilities in a non-disruptive manner
- Analyze perimeter defenses

### **Penetration Test Deliverables**

Immediately after the external and internal penetration test, the Baker Business Center will provide verbal communication and an initial finding report of all issues as discovered and recommendations suitable for creating a remediation action plan to address the findings and recommendations of the penetration test.

The findings in the initial report are structured to facilitate immediate remedial action by the technical administrators listing the following information for each identified vulnerability:

- > A text description of the vulnerability
- > The business and technical severity inherent in the vulnerability
- > The vulnerability classification (Critical, High, Medium, or Low) that describes the risk level as a function of vulnerability impact and ease of exploitation.
- > A detailed technical description of how to reduce the exposures inherent in the vulnerabilities

The Baker Business Center will provide retests of any vulnerability reported for 90 days after the initial report is released. Retests requests are made via email and must include a management response that indicates the finding ID, host (IP Address), and port needing a retest. After remediation has occurred and upon the revalidation of discovered vulnerabilities, the Baker Business Center will release a full-scale technical report containing detailed findings.

### **Customer Responsibilities**

To perform the penetration test a timely and efficient manner, the Baker Business Center will require assistance from Customer for the following:

- Appoint and make available a project manager to work with the Baker Business Center Staff for the duration of the Services. (This person must have authority to act on behalf of the Customer.)
- Furnish the Baker Business Center auditors with information and data on Customer's operations, activities, and existing systems, as reasonably required to achieve the project objectives.
- Provide the Baker Business Center Auditors with necessary security access to networking systems and Customer's facilities during the performance of Services.
   For the internal test we will need to test with a domain admin service account.

### **Project Fees**

The retail value for the services detailed in this Statement of work is approximately \$20,000. Since this is the initial project for what we hope to be a long lasting relationship, the Baker Business Center will perform this initial External penetration test and vulnerability analysis, Internal penetration test and vulnerability analysis, and firewall evaluation test at no cost to the Customer.

The following summarizes the fees for this project:

Type of Project:	
Engagement Cost	\$0.00

### **Exclusions**

Not included in this Statement of Work is the remediation of discovered issues.
